

# Article 21 – Evaluation Studies for School Roof Repairs

---

- Engineering Study of the Roofs at the Hopkins School and the High School
- The roofs at the Hopkins and High School are now entering the phases of their useful lives in which future replacements need to be planned. To begin that process, the School Department is requesting funding for the purpose of conducting engineering evaluation services related to the existing conditions and remaining life-potential of the roofing systems at the Hopkins and High Schools. Such evaluation will provide options and alternatives for roof replacement, including cost estimates to be used when applying for potential future MSBA funding.
- The requested amount to do this work is \$30,000.
- There will be a future capital request to undertake the construction.

## Article 22 - School Safety & Security

---

- The School Safety Committee is comprised of two dozen Hopkinton individuals including Public Health & Safety, Youth Services, the clergy, a physician, and several School Department staff. The fruits of their work include a 3-year Safety Plan which was implemented last summer with the installation of updated monitoring systems in all school buildings.
- We are requesting funds to continue this work via the installation of additional monitoring, security, and access equipment throughout the District.
- The requested amount to do this work is \$152,400.
- The School Department has also included an additional \$37,979 in its operating budget to purchase ongoing safety training, materials, and equipment, including two-way radios.
