

# Article 22: Re-purposing of Appropriated Funds – ATM 2016 Article 23

- Re-purposing of \$50,000 to design, permit, and construct the treatment of water from “Whitehall Wells” #4 & #5 with potassium hydroxide (KOH)
- Wells #4 & #5 can only be used during emergency drought conditions due to high levels of iron and manganese
- If the total volume of water from the wells can be pumped it will yield **up to 828,000 gallons per day of water** thereby reducing our need to purchase water

Wells #4 & #5
